SUMMARY

Motivated Electronics and Communication Engineering student eager to apply programming knowledge and problem-solving skills in a practical environment. Demonstrates strong willingness to learn and adapt, with a foundational understanding of programming languages such as Python and C. Interested in contributing to team projects and enhancing technical capabilities.

LANGUAGES

Tamil: First language

English: A2

Elementary

PROJECTS

Gesture Control System for Call Management:

- Developed a gesture-based system to attend or reject phone calls using hand gestures.
- The system detects specific gestures and performs call actions without touching the device.
- Designed to improve hands-free interaction and user convenience.

Electricity Monitoring System

- Built a system to moniter electricity usage and track power consumption.
- Helps users understand and manage energy usage efficiently.

Movie Website (Offline)

- Created a website to display and play movies stored in local storage.
- Implemented using HTML, CSS and basic web development concepts.
- Built an interface to organize and view movie files easily.

HACKATHONS/COMPETITIONS

- Smart India Hackathon - 2025
- National Level Symposium - 2025
- Simulathon - 2025
- Oracle - 2025

HACKATHONS/COMPETITIONS

- Smart India Hackathon - 2025
- National Level Symposium - 2025
- Simulathon - 2025
- Oracle - 2025

SKILLS

- Programming Languages: Pythen, C
- Basic Knowledge:
  Problem solving, Electronics systems
- Tools & Platforms:
  Basic programming environments and development tools

EDUCATION

Kongu Engineering College
Perundural, Erode

Bachelor of Engineering. Electronics and Communation Engineering
08/2024 – Present
